

00:23:26 Rebecca Malburg: I LOVE the new menu – for some reason I could never remember where some of the sections were (articles in particular for some reason), but this menu style makes it easy for me to find it

00:26:49 Ben Goshow: I like it too. And if your screen is wider than Shayla's you can expand that sidebar to see the titles a little more easily.

00:28:20 Ben Goshow: Quick note: the CMS is still not very mobile-friendly, but I think they're heading that way, and that collapsible sidebar is a step in that direction.

00:28:55 Rebecca Malburg: I also really love the search bar at the very top that searches everything (ie. Not just sermons or blogs, or events). Just yesterday, I needed to find some text that a pastor wanted updated, and I couldn't remember if the section was an article, a blog, or what, and so rather than click through to sections to search, and click through blogs to search, I was able to search, and it showed me exactly where it was.

00:29:17 Ben Goshow: Nice!

00:29:23 Mielke: How do you add color to your text when doing a page, article, etc? Shayla's page just showed color. How do I do that on my end?

00:30:50 Ben Goshow: Heidi, those colors are part of that site's theme (the red and teal colors) and are added to the content editor. We can bring some of those colors from your theme into your editor too, but it may require some programming if they don't already exist.

00:31:09 Mielke: Thanks Ben

00:40:47 Rebecca Malburg: I've never used the summary feature – sounds useful

00:43:06 Rebecca Malburg: Is there a max number of events (like pages)?

00:45:10 Rebecca Malburg: That's good to know about the CCB calendar – we're getting ready to add the Pushpay app which has CCB integration, so that may keep us from having to duplicate events

00:46:01 Mielke: Yes. Rebecca. It was hard duplicating and it is so much easier.

00:46:20 Shawn Jones: Rebecca, we can talk about that more because Monk has an integration with CCB now that allows one way syncs for events and groups.

00:46:34 Rebecca Malburg: Awesome!

01:00:53 Jason Wetherholt: we need to run to our next gig. thanks a ton, Fishhook!!

01:04:06 Ben Goshow: Thanks Jason!

01:14:01 Cathy: Can you create a "photo album" or "slideshow" to a page? For example, if you wanted to share several photos from an event or mission trip?

01:14:11 Cathy: ^photo

01:27:34 Becca Malburg – The Ridge: Quick edit!! That looks like a life changer!!

01:27:36 Mielke: Easy Edit is my favorite feature!!!!

01:31:14 Mielke: what's the name of that program?

01:31:41 Ben Goshow: Hotjar

01:32:37 Becca Malburg – The Ridge: Just connected our google

analytics (we already had google analytics set up through you guys) – super easy to do, and looks super slick.

01:32:50 Becca Malburg – The Ridge: * just connected it to ecclesia

01:37:44 Becca Malburg – The Ridge: Thanks for doing this! Super helpful to see new “stuff”/stuff we weren’t fully utilizing!
